

AMENDMENTS TO THE SPECIFICATION

IN THE ABSTRACT OF THE DISCLOSURE:

Please amend the Abstract of the Disclosure with the rewritten Abstract of the Disclosure located below. A clean version is provided on a separate sheet attached hereto.

ABSTRACT OF THE DISCLOSURE

~~Trademark label (1) manufactured as mentioned above can provide unique trademark label attaching trademark label (1)~~ A manufacturing method of trademark label of the present invention comprises a process of making rubber sheet which produced by compounding the ingredients of natural rubber composite, a process of cutting the rubber sheet according to the design of trademark label, a process of spreading primer on adhesion side of cut trademark label and drying at normal temperature for about 5 minutes, a process of spreading binder on the primer-spread and dried part of trademark label, a process of inserting the glue-spread trademark label into the cavity of metallic mold and gluing (first gluing process) the trademark label on artificial leather(2) and natural rubber can be, a process of removing unnecessary impurities of trademark label attached to artificial leather so that with its lightness, when it is used on out soles such as marathon shoes it can reduce the weight of the shoes and can possibly bring record break effect and when it is brunt, it does not produce environmentally-harm substances such as dioxin therefore it is very effective invention. (by first gluing process), a process of inserting trademark label whose impurities

are removed into the metallic mold and hot-pressing at the temperature of about 150°, and a process of refrigerating the trademark label hot-pressed on artificial leather to the temperature of about 5°C.
